TURKISH PUNISHMENTS.

The Bastinado Abolished in the European Part of the Empire.

In Turkey twenty years ago men were hanged for trifles; tradesmen who sold short weight might be nailed by the ear to their own doorposts, and petty thieves, as well as men who were pertinent to officials or who refused to pay their taxes twice over, were bastinated on the soles of the feet. This last punishment, by the way, was light or cruel according as the patient was accustomed to go barefooted or to spend his life in babouches. The watercarriers, porters, street fruit-sellers, and peasants generally, whose soles were like horn, cared little for twenty-five cuts with the bamboo, but to tradesmen, clerks and women the stripes were excruciatingly painful and brought weeks of lameness.

The present sultan has abolished the bastinado in the European part of his dominions, says Temple Bar, and practically done away with capital punishment, except for brigandage and for attempts of assassinating high officials. Even brigands, however, are only hanged when they have laid hands on foreigners and caused an outery in the European press. Genuine Tueks seldom find their way into jail, saving for murder or inability to pay taxes, and the murders are often committed under the influence of religious fanaticism, when the Mussulman, driven mad by the fast of the Ramadan or by the rejoicings of the Bairam holidays, runs amuck with a knife among

a crowd of Glaours. Such offenders, however, are always leniently dealt with by the pashas, unless, of course, they happen to kill a foreign Christian, hav

ing an ambassador to avenge him. In Turkish prisons the Mussulmans and Christians are kept apart, and the former, a grave and gentleman-like lookng set of men, bask in the sun most of the day, smoking, and they perform fre-quent ablutions at the trickling fountain in the middle of their airing yard. They give no trouble, and wait with the most patience until it shall please Allah to open the prison doors for them. The Christians, a heard of Greeks, Bulgarians and Maccdonians, with the most villainous faces, morals and manners imaginable, have to be ruled with a ight hand to be kept from stranging one another. When it becomes necessary to hang one of these gentry the Greek goes to his punishment struggling and howling; the Turk makes no more ado about the matter than if he were going to have his head shaved. As the Turkish exchequer provides no hangman or ropes for executions, some curious things occasionally happen. Not long ago a Turk who had to be hanged at Kirdjoli walked about the town for an hour with two soldiers who had been ordered to execute him. These

soldiers did not mean to buy a rope with their own money, and they failed to borrow one. Eventually they broke into a stable, stole a rope, and hanged their

Mrs. Winthrop was a puny, frail woman, possessing neither will nor individuality. In the days when he was but a struggling cleric her husband had scarcely deigned to consult her wishes even on household affairs, and when he reached piscopal rank, no more was this meeke wife accounted as of importance in his social or domestic relations, but he loved their only daughter with an affection. surprising in one of so uncongenial a nature.

She was a bright, fair-haired girl, just blooming into womanhood, and his lordship of Rochester thought nothing too precious or too good for his cherished shild.

Dr. Winthrop was fond of music, so was his daughter, and to hear her lovely voice in the cathedral choir made the proud prelate thrill with emotion. Constance and her musical talent touched the only weak spot in the bishop's nature, and under his regime the arts of music and singing were prominent features in Rochester society.

The leading tenor parts were sung by Henry Sherstone, a good-looking young fellow about twenty-three years old, who was a "teller" in the principal bank of the city, and possessing a singularly sweet and powerful voice.

Many an invitation to private concerts and musical parties was refused by young Sherstone, and people called him selfceited in consequence-particularly as it was known he attended all gatherings at the episcopal palace-though when ques tioned as to the cause of his absence from other entertainments, he generally sought refuge in the excuse of not feelng well.

This statement did not meet with much credence, and as I have said, the young bank clerk was cited as a sad example of vanity and self-esteem. When however, he did consent to sing, all was forgotten and forgiven in the pleasure of listening to his powerful and sympathetic voice. The real cause of Henry Sherstone' refusal of the courtesies extended to him was simply basifulness. Instead of being vain he was retiring and shy, possessing little confidence in himself, and it required a great effort on his part to crew up his moral courage to the point of appearing in society. This weakness he scarcely ever con-

essed, but Constance Winthrop had seen through and understood his nature, liking him the better for what her father styled his "humility," though whenever the young clerk happened to meet the bishop's daughter he only lifted his hat and quickly turned away; and in the choir he remained apart from her unless their musical duties brought them together.

The Hon. George D. Mr. Bisbee was as good a soldier as ever went to war, and besides getting a full dose of camp life and ser-

"What is this I hear, unhallowed Finding himself near General Butler and scoundrel?" thundered the bishop's voice, as striding suddenly forward he finding the old gentleman cordial and good-natured, he said to him that he stood between them. A PERPETUAL MOTION PUMP.

Novel Means of Economizing Labor at Ocean Beach.

Underneath the pier of the Bond wave power company at Ocean Grove, N. J., a mammoth iron egg floats upon the top of the waves, says the New York Times. In mild weather the egg bobs up serenely, rising to a hight of about fourteen inches above the dead level of the sea, but when the weather is rough and great rollers come rushing in, the egg rises forcefully upward five feet or more. It an not get loose, for it is made fast to he pier by long, strong arms of iron. Up from the top of the mammoth egg a rope runs, and after it has passed over a oulley it stretches on shoreward and at last enters a wooden building situated upon the beach. In the building is a pump, and the rope is in connection with it. The pump is lifting about three thousand gallons of water a minute, raising it distances equivalent to the height of

the waves. The explanation of the apparatus and the work it is doing is that Mr. N. O. Bond, whose namesake the Bond Wave Power company is, has successfully completed an experiment undertaken primarily to determine if it were possible make the ocean, by the motion of its waves, pump enough of itself into Wesley lake to make that lake a body of salt

water. There are people living in Asbury Park and Ocean Grove who, considering that the sources of the water of Wesley lake are in swamp lands, judge that the lake is to some ex-tent a health-menacing body of water, and they have for some time wished that it might be salted. Mr. Bond says that he will have no difficulty in making Lake Wesley salt, and he expects to do it this summer. He says that he is per-fectly satisfied that his new wave machine will not only do the work which it was especially devised to do, but he is also assured that it will be found a valuable machine for doing other things which need to be done economically.

Is There an Onyx Trust?

"There is no onxy trust," said B. J. Coleman of California to a reporter for the Chicago Tribune. "Dispatches from New York a day or

to ago stated that all the onyx quarries in Mexico had been purchased by a New York syndicate which proposed to secure a monopoly on this ornamental stone. It was claimed that the syndicate would put the price iup higher than the Effel tower, but that people would be forced to pay the prices, for the combination would own all the onyx in this country. That is extremely misleading, for the hest onyx quarries in the world are in keep ahead, and your success is alifornia. The onyx of Solano county s unexcelled in beauty. So it came to pass that young Sherstone's magnificent voice was seldom heard in the cathedral or at the palace and the bishop would remark to his friends with nompous solemnity:

"I have grave doubts of that young man Sherstone. I fear he is drifting into evil courses.

Constance Winthrop thought often and sadly of Henry Sherstone and his exquisite voice, and many a night did she dream of the duets they used to sing together-awaking to regret that she might hear those notes no more. It happened one morning towards the

end of summer that Henry Sherstone, feeling tired and overworked, sought a few hours' leave of absence, and obtaining a brief respite from work, went for a short ramble into the country.
